LED Technology with VEKSAN Quality...

VEKSAN Lighting has been established in 1986 aiming the purpose of manufacturing high quality, contemporary and modern luminaires to satisfy and fulfill the requirements and expectations of the illumination industry that demonstrates continuous development in our country and worldwide. VEKSAN has been performing only in lighting fixtures since it was founded and has become a leading and oracle company in lighting fixtures through channelling its entire knowledge and energy towards this aspect.

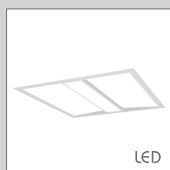

VEKSAN Lighting, which has become a reliable and favourite brand by ensuring continuous development and progress while without compromising the quality, continues to fulfill and satisfy the rapidly diversifying customer expectations and requirements ideally. This achievement is procured through its qualified and trained employees that are respectful to the ethical values, aware of team spirit and the utilized advanced technology machinery. The company schedules new products each day with parallel to the innovations and changes in the industry and prevails to increase the customer satisfaction and business potential perpetually.

VEKSAN Lighting has been exporting in high volumes mainly to The United Kingdom, Germany and to other countries such as Denmark, Sweden, Belgium, Hungary, Bulgaria, Ukraine and Romania in virtue of its world-class production quality and potential, innovative practices along with its leading position in our country's lighting industry. Its influential manufacturer identity enables the company for custom manufacturing not only for its own brand but also for the pioneering brands in the European Lighting industry.

IP Rating Chart

IP 20	IP 20
First Index Figure	Second Index Figure
Protection against the penetration of solid matter and dust	Protection against the penetration of liquids
0 Unprotected	0 Unprotected
1 Protected against solid matter greater than 50 mm	1 Protected against vertical water splashes (condensation)
2 Protected against solid matter greater than 12 mm	2 Protected against vertical water splashes of up to 15° of the vertical
3 Protected against solid matter greater than 2.5 mm	3 Protected against vertical water splashes of up to 60° of the vertical
4 Protected against solid matter greater than 1 mm	4 Protected against water projections in all directions
5 Protected against dust (without damaging sediment)	5 Protected against water assault in all directions
6 Protected against dust	6 Protected against water assault similar to heavy seas
	7 Protected against immersion
	8 Protected against prolonged effects of underwater immersion

Logos

It refers new products launched in markets.	It refers products have IP65 protection class.
It refers glare controlled products with microprismatic lens.	It refers products have 120 lm/W high efficiency solution.
It refers glare controlled products with mat reflector.	It refers track light rail have DALI option.
It refers products with direct and indirect lighting solution.	It refers products have CRI90 Multichip LED option.
